

Built Environment Engineer

Material Index is seeking a knowledgeable engineer from a built environment engineering background (Structure, Civil, Mechanical, Mechanical Electrical and Plumbing, Sustainability) with a minimum of 3 years industry experience, to join our growing team.

Material Index is a young construction technology company focussed on enabling material reuse at scale in the construction industry. We offer services in material audits and materials brokering, supported by our end-to-end proprietary digital platform. This platform is also available to third parties under licence. We are also brought in as material and component reuse consultants on a broad array of projects.

The Material Index team consists of architects, engineers and software developers working in close proximity in a collaborative, fast-moving and stimulating studio environment.

Material Index is seeking a team player to join us in a range of activities including project management, audits, digital product development and consultancy. The applicant's previous experience will be invaluable but this is not a traditional engineering role. Training will be provided and there is room for extensive professional growth and development within the company. Salary will be dependent on experience and in line with industry guidelines.

In order of preference we are looking for the following characteristics:
Conscientiousness, sociability, intelligence, curiosity, drive.

This role would be a good fit if you have at least two of the following interests:
Circularity, Surveying, Historic and Contemporary Building Systems

What you will do:

- Client and Project management
- Design Team Presentations
- Materials Research
- Site-based surveying and data management
- Supply chain analysis
- Digital product development

Desirable but not essential skills:

- A diverse software skill set including Revit and OneClick LCA

Material Index expects all staff are expected to engage in professional discourse. We welcome people from all backgrounds with the relevant sensibilities and aptitude. All appointments will be made on the merit of skill and experience relative to the role. Any offer of employment with Material Index will be conditional upon having the right to work in the UK.

Please submit a CV and a PDF portfolio of maximum 15 MB via with a short cover letter to
team@material-index.co.uk
